

Drip & Micro Irrigation

Irrigation-Mart specializes in drip/micro irrigation supplies and design. We offer a wide range of products to meet the individual needs of our customers. Drip/micro irrigation includes micro sprinklers, jets, foggers, misters, drip emitters, spray stakes, in-line drip hoses, drip tape, and components to compliment these items.

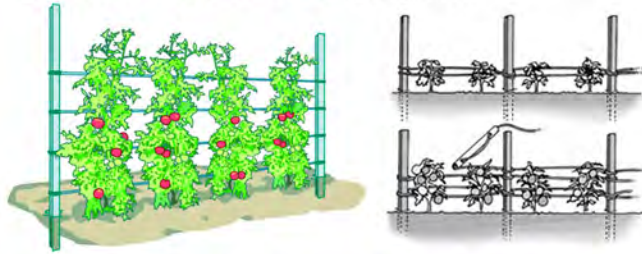

Plasticulture Items

Irrigation-Mart offers a complete line of plasticulture materials and equipment for installation and removal of drip line and plastic mulch. We also carry planters, and other implements including tillers, cutters, discs, fertilizer/lime spreaders, sprayers, and much more.

Tomato Stakes & Twine

Irrigation-Mart can assist in your growing needs with products like treated wood stakes and twine. We have a stocking yard to help insure availability of these products and economical shipping rates.

Who We Are

Established in 1978, we have been serving the irrigation industry for over 30 years. Irrigation-Mart is a "closely held" company with approximately 30 trained employees, including certified agricultural irrigation specialists, certified irrigation designers, agronomists, landscape horticulturalists, and registered professional engineers. We stock a full line of irrigation and related products from well over 200 manufacturers in our 2-acre warehouse. This ensures that orders can be shipped in a timely manner to customers worldwide via UPS, FedEx, USPS, motor freight, etc. We service the United States and other countries, including Mexico, Central, and South America.

Irrigation Design

Irrigation-Mart's strength comes from our knowledge and SAVVY/understanding of products and customer's needs. We pride ourselves in being able to troubleshoot and problem solve issues for our customers. We strive to offer our customers economical, efficient systems while providing quality material and the highest level of service.

Typical Drip System Layout

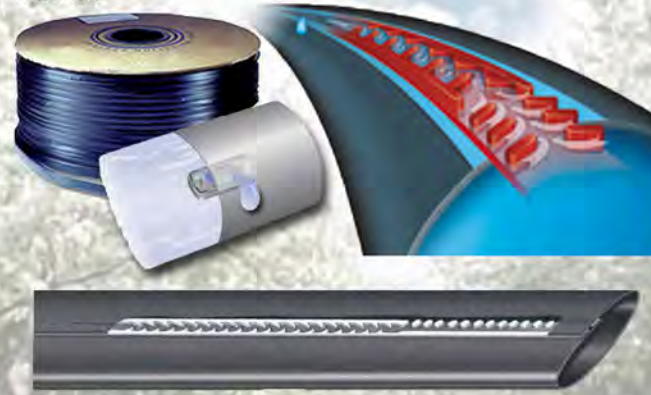

Pumps & Power Units

Irrigation-Mart stocks several brands and types of pumps, power units and pump controls to meet your application. We also have in-house designers and engineers to assist in the selection of the correct product for the job. Our shop can fabricate/build complete pump units or stations based on the customer's need.

Drip-Tape

Drip Tape delivers water and nutrients directly to the root zone maximizing plant growth and production while limiting problems associated with inefficient irrigation methods such as: erosion, disease, weed growth, plant stress, soil saturation, energy costs and water conservation. Drip tape is used on a wide variety of row crops like; strawberries, peppers, tomatoes and watermelons. Drip tape is also used in subsurface drip irrigation systems (SDI) on cotton, corn, sugarcane and other agronomic crops. We stock a wide range of spacing's, flow rates, and wall thickness's to provide the correct product for the application in a timely manner.

Soil Moisture Monitoring

Irrigation-Mart offers soil moisture monitoring equipment and management services. We offer many options for specific needs of the grower, from manual units to remote and automatic units. Soil moisture sensors allow the grower to maintain the ideal soil moisture level to minimize plant stress and leaching due to under or over irrigation.

CropSense[®] JOHN DEERE WATER

Chemicals, Fertilizers & Injectors

Irrigation-Mart carries a wide range of Ag chemicals including pesticides, fertilizers, and system maintenance chemicals (acid, chlorine, etc.). We not only supply the materials to inject but also a wide range of injectors to do the job. Contact us for assistance with your chemical and injector needs.

Filtration

Irrigation-Mart offers a wide selection of filters to insure the correct filter is available for the application. We carry media, disc, and screen style filters as well as products to compliment these. We can assist in the selection of the proper size and type of filter required for your application, as well as automation of the backwash/cleaning process.

Sprinklers, Travelers & Pivots

Irrigation-Mart offers a large selection of sprinklers for AG, Turf, Greenhouse/Nursery, Log Yard, Waste Water, Dust Control, Frost/Freeze protection and other applications. We also handle travelers and pivots as well as components to compliment these sprinkler systems.
