

Who We Are

Established in 1978, Robbins Association/Irrigation-Mart, Inc. is a "closely held" company with approximately 30 trained employees, including certified agricultural irrigation specialists, certified irrigation designers, agronomists, landscape horticulturalists, and registered professional engineers. We stock a full line of irrigation and related products from well over 200 manufactures in our 2-acre warehouse. This ensures that orders can be shipped in a timely manner to customers worldwide via UPS, FedEx, USPS, motor freight, etc. We service the United States and other countries, including Mexico, Central, and South America.

Drip-Tape

Drip Tape delivers water and nutrients directly to the root zone maximizing plant growth and production while limiting problems associated with inefficient irrigation methods such as: erosion, disease, weed growth, plant stress, soil saturation, energy costs and water conservation. Drip tape is used on a wide variety of row crops like strawberries, peppers, tomatoes and watermelons. Drip tape is also used in subsurface drip irrigation systems (SDI) on cotton, corn, sugarcane and other agronomic crops. We stock a wide range of spacing's, flow rates, and wall thickness's to provide the correct product in a timely manner.

Plasticulture Items

Irrigation-Mart offers a complete line of plasticulture materials and equipment for installation and removal of drip line and plastic mulch. We also carry planters, and other implements including tillers, cutters, discs, fertilizer/lime spreaders, sprayers, and much more.

Plastic Mulch

- Black promotes earlier cropping by heating the soil
- White & silver keep soil cooler
- Controls early weed competition
- Regulates and preserves soil moisture
- Deters pests
- Increases pesticide (e.g. fumigants) efficiency
- Keeps fruit clean
- Suppresses ground rot
- Prevents leaching of fertilizers and other chemicals
- Decreases both horizontal and vertical erosion
- Enhances soil structure

Irrigation- Mart also carries tunnel plastics & row covers.

Prices subject to change.

Standard Features

Crowned bed is higher in center. Teflon lined bed press gives a smooth, pressed seed bed helping eliminate potholes. Adjustable tension on plastic roll and independent spring loaded press wheels ensure plastic is stretched tightly. Large cover disks are independently spring loaded and are fully adjustable to insure that plastic is covered securely. Designed for use with compact tractors in high tunnels and fields where close spacing is desirable.

Model RB436 - \$1,425.00

Lays 3ft wide plastic, forming a 20inch wide bed that is 4inches tall. A 25hp-30hp tractor is required to use this implement.

Model RB448 - \$1,850.00

Lays 3ft or 4ft wide plastic, forming a 20inch or 30inch wide bed that is 4inches tall. A 30hp-35hp tractor is required to use this implement.
