

Layflat (Discharge Hose)

- Use to transfer water from water supply to field
- May be driven over to allow access to field
- Easy to move or roll up, replaces hand move pipe
- May be used for header lines in drip irrigation
- Many connection options available
- Uses same fittings as Oval Hose or Flat Tube

TAPE TO LAYFLAT HOOK UP

Oval Hose

- Available in 21psi & 42psi.
- Durable - drive over without damaging it.
- Used surface or subsurface.
- Easy to install & hook-up.
- Can repair economically with plugs.
- Works with same fittings as layflat.
- Used as header line for low pressure systems.
- Typical life is longer than layflat headers.

21 psi Oval Hose	
Size	Length
1.5"	600'
2"	450'
3"	200'
4"	130'

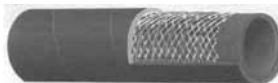

42 psi Oval Hose	
Size	Length
1.5"	350'
2"	250'
Available in cut lengths	

PVC Suction Hose

Use on suction side of the pump. Reinforced with PVC coils to prevent line from collapsing. Flexible to allow for rise and fall of water level and elevation change.

3"	60	8"	40
4"	50	10"	40

Rubber Suction & Discharge Hose

Heavy duty suction & discharge hose for irrigation use. Temp range -30-185 *F. Available in 150psi 1-10" or 75psi 6-10". Comes in standard lengths of 100' (1-4") & 20', 25', or 50' (6-10"). Call for pricing.

Armin Poly-Pipe®

FAST, EASY INSTALLATION

Preferably, Poly-Pipe should be laid in a shallow furrow on the grade. Such a furrow can be plowed and the pipe laid in one operation with a simple tractor towed rig. WATER VOLUME CONTROL GATE; Recommended where soil conditions or type of crop requires a large or variable amount of water. These units have a 2-1/2" opening, and are adjustable with a simple sliding gate from full open to closed. Install in seconds in the field with a simple hand tool. Can be removed and reused indefinitely. Otherwise, punch 3/4" holes at 2 o'clock.

ITEM	LENGTH	WEIGHT
10" Magnum XX	1320'	150lbs
12" Magnum XX	1320'	181lbs
