Clip or Barb Stakes Assemblies
 Sprinkler stakes are used to keep jets or micro spinners upright in landscape or orchard use. These are available as assemblies or individual components.

Available in a wide range of flows and diameters. 3/8" base. Optional **break off spinner tab** to direct water into the root zone on young trees.

VI Classic Color	Flow (gph) 20/25psi	Dia. (feet)

Brown	65.1/72.8	34.1'

- ### Micro-Sprinkler VI
- Anti-insect spinner retracts to seal-off nozzle when not in operation
 - Deflector plate design maximizes start-up torque to ensure reliability of operation in the most hostile environments
 - Low angle of throw and large droplet size for maximizing under foliage penetration and less susceptible to windy conditions
 - Double G-frame design provides long life under harsh field conditions
 - Engineered to provide uniform water application for low volume, under-tree, and over-head installations

Green	9.5	14.8'
Blue	12.5	16.4'
Brown	14.5	16.4'

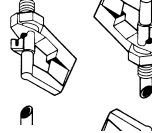

Single Piece Jets offer a fan type spray pattern for very effective watering.

Installation is fast and easy. Great for flower beds and delicate stock. **Roto Spray** micro spinners give excellent distribution uniformity. Great for use in landscape, greenhouse, and orchards.
