

We would like to assist in the design/layout of landscape irrigation projects whether it be for a residential or commercial application. Generally these services are at no extra charge but with the understanding that materials should be purchased from us if we are competitive. Along with a layout we will provide a quote for materials that will be required and installation instructions if necessary. With the possible exception of PVC pipe which can be picked up locally, components of a landscape irrigation system can be shipped economically from our warehouse to most sites.

Weathermatic offers a full line of irrigation heads, valves, and controllers for turf

Funny pipe and funny pipe fittings. Used to join sprinkler heads to PVC line and provide flex to prevent fitting failure or cracking PVC pipe when driven over.

Pop-up sprinklers are used in small turf areas or flower beds to conceal and protect your irrigation heads. These are available in 3", 4", 6", and 12" pop-up heights in both male or female nozzle styles. Pop-ups can also be easily adapted to micro sprinklers or jets for greater options of patterns and flow rates. See the micro sprinklers page for jet patterns and flows.

### Nozzles

- 17', 15', 12', 10', 8', 6', side strip, end strip, or center strip
- Adjustable or fixed arc
- Male or Female thread
- Shrub adapters to hook to poly risers
- Adapt to micro sprinklers with the Maxijet adapters.

### QUICK COUPLING VALVES

- Weathermatic quick coupling valves provide convenient manual connection for surface hose oils and above-ground impact sprinklers.
- All quick coupling valves have a thermoplastic locking cover. Choice of easy to locate yellow cover or purple non-potable water identification cover. Industrial grade red brass valve body.
- Keys for locking covers are ordered separately
- 3/4" Quick Coupler Valves feature two-piece bodies. 1" and 1 1/2" Quick Coupler Valves have one-piece bodies.

### COUPLERS

- Stainless steel handle is included with each coupler
- Coupler has industrial grade red brass body
- 1/2" and 3/4" are single lug. 1 1/4" is double lug.

### WILKINS BACKFLOW PREVENTERS

**Atmospheric:** Used downstream of the master valve and must be 12" above highest point in system

**Pressure Vacuum Breaker:** In-line backflow prevention with vacuum breaker

**Double Check:** In-line backflow prevention on pressurized systems

### Pro Plus Rotor

- 1
- 2
- 3

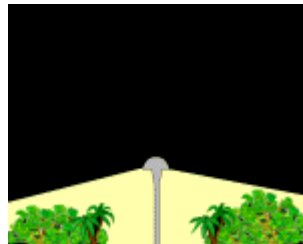

1. Purple Top for reclaimed water
2. 12" Rotor
3. Rotor body for risers

1-10gpm / 22-50' Radius / 30-70psi

### Vista Outdoor Lighting

We offer a large range of low voltage landscape lighting. Pathlights, up-lights, down lights, underwater lights, accent lights, and many other styles are available. Call for a product brochure or visit Vista's web site at

We handle the full line of Northstar tools (shovels, rakes, valve openers, and more).
